

APPLICATION FOR BOAT MOORING INSTALLATION

Installation of private boat moorings requires permission from the Port Director following an application review by the Dept. of Environment. A suitable mooring will not create a navigation hazard or result in any damage to coral reefs or marine life. The mooring must be suitable for the type and size of vessel, and the owner is responsible for mooring maintenance and any damage caused by the boat and/or mooring.

Three types of mooring may be considered: anchor, dead-weight, and embedded. Embedded (i.e. drilled pins cemented to the seabed) is preferred.

There are currently no fees for installation of boat moorings approved through this application process. The Department of Environment will be inspecting sites to ensure compliance with permit conditions. Unauthorized installations may be ordered to be removed and/or subject to prosecution under the Marine Conservation Law.

PROJECT INFORMATION

Location of proposed mooring:

- Latitude _____ Longitude _____
- Attach map illustrating location

Size and type of vessel proposed to use the mooring:

Type of mooring proposed:

- Embedded Specify type of anchor pin
- Dead-weight Specify material and weight
- Anchor Specify type and weight
- Other (*Specify*)

Other details:

- Type of mooring buoy
- Type of mooring rode (rope, chain, etc.)
- Radius of impact to the seabed (distance from mooring that chain contacts seabed)

PROJECT INFORMATION CONTINUED

Description of seabed at proposed mooring location:

Water depth _____

Type of seabed:

- Sand
- Sand and rubble
- Hard bottom
- Coral reef (including hard coral, sea fan, gorgonian and soft corals)
- Seagrass

Distance from mooring to nearest coral reef _____

**Mail completed application to Dept. of Environment; PO Box 486; Grand Cayman KY1-1106—or fax to 949-4020—
or drop it at our office in the Cayman Environment Centre at 580 North Sound Road George Town.**

I hereby certify that the information provided is accurate and true.
